## **Arrays**

## Find a pair in an array of size 'n', whose sum is X

```
import java.io.*;
import java.util.HashSet;
public class FindPairs
void findpairs(int arr[], int sum)
  HashSet hs=new HashSet();
 for(int i=0; i<arr.length;i++)</pre>
    int temp=sum-arr[i];
    if(temp>0 && hs.contains(temp))
       System.out.println("("+arr[i]+","+temp+")");
    hs.add(arr[i]);
 }
public static void main(String[] args)
  int A[]={ 1, 6, 8, 2, 7, 10};
  FindPairs fp=new FindPairs();
 fp.findpairs(A, 9);
}
```
